Ideation Phase

Define the Problem Statements

Date	08 October 2026
Team ID	_____
Project Name	SkillWallet
Maximum Marks	2 Marks

Customer Problem Statement Template

Create problem statements to understand the point of view of SkillWallet users. The statements focus on difficulties faced by users while managing, presenting, and verifying their skills, achievements, certifications, and learning records. These problems help the team identify suitable solutions for the SkillWallet project.

SkillWallet – Customer Problem Statements

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student / learner	Store and organize my skills, certificates and achievements	My records and information are scattered across different documents and platforms	There is no single place to maintain my skill information	Confused and worried about losing important achievements
PS-2	A job seeker	Show my skills and achievements	It is difficult to present all my verified skills, certificates and achievements in one place	My certificates and achievements are stored separately	Less confident during job applications
PS-3	An employer / recruiter	Verify the skills and certificates of candidates	Checking candidate records manually takes time	Skill information may be spread across different sources	Uncertain about the accuracy of candidate information

Project Focus: SkillWallet provides a centralized way to maintain and present a user's skills, certifications, achievements and related learning records.
