Empathy Map Canvas

Anempathymap helpstheSkillWallet team understand the behaviours, attitudes, goals and challenges of its users. The following canvas is prepared from the SkillWallet project perspective, focusing mainly on students and job seekers who need to manage and present their skills, certifications and achievements.

SAYS	**THINKS**
• I want all my skills and certificates in one place. • I want to show my verified skills to employers. • I want an easy way to update my achievements. • I need my records to be easy to access.	• Are my certificates and skills stored safely? • Will employers trust my skill information? • How can I present my skills clearly? • I should not lose my important records.
DOES	**FEELS**
• Collects certificates and achievement records. • Updates skill information when new skills are learned. • Shares skill information while applying for jobs. • Searches for opportunities based on skills.	• Confused when records are scattered. • Worried about losing certificates. • More confident when skills are organized and verified. • Motivated when achievements are easy to present.

USER GOALS

•Maintain a centralizedskill profile. • Store and organize certificates and achievements. •Present credible skill information to employers. • Reduce the effort needed to manage career records.

USER CHALLENGES

•Skillandcertificate informationmay be scattered. • Manual verification can take time. •Users may find it difficult to present complete skill information. • Keeping records updated can be inconvenient.
